

GES EX

Full-Fledged, Highly Scalable and Multi-Functional Electronic Trading System for Equity Brokers Supporting Exchange Traded Stocks, Warrants, CBBC, ETFs and REITs

GES EX is a multi-functional securities trading system:

- Support multi-asset
- Various order type with shortcut
- Real-time margin calculation
- FIX connection with 3rd party global securities trading system
- Fund management function including MAM, Pre-Trade Checking and Trade Allocation, etc

HKEx Certified

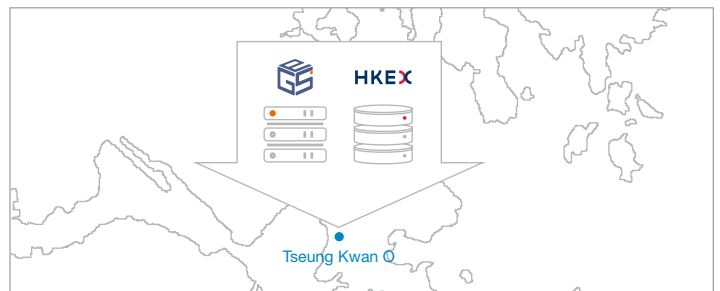

GES is one of the few independent software vendors who have passed both the certification tests of HKEx OCG trading platform and OMD-C market data platform.

Easy Integration with 3rd Party Back Office Settlement System

GES EX's customizable interface can be seamlessly integrated with GES Xentrix and other 3rd party back office settlement systems which scheduled day-end job can be executed automatically. Back-office staff can easily handle the settlement job of GES EX orders without readjusting to a new system.

Powerful I.T. Infrastructure

GES server is strategically located in Tseung Kwan O which is in close proximity to HKEx primary datacenter to provide low latency trading service. GES also provide customized service such as high availability, 7x24 support, comprehensive database files backup which helps brokers to prevent unplanned system downtime and data damages that may bring irreparable harm to the business.

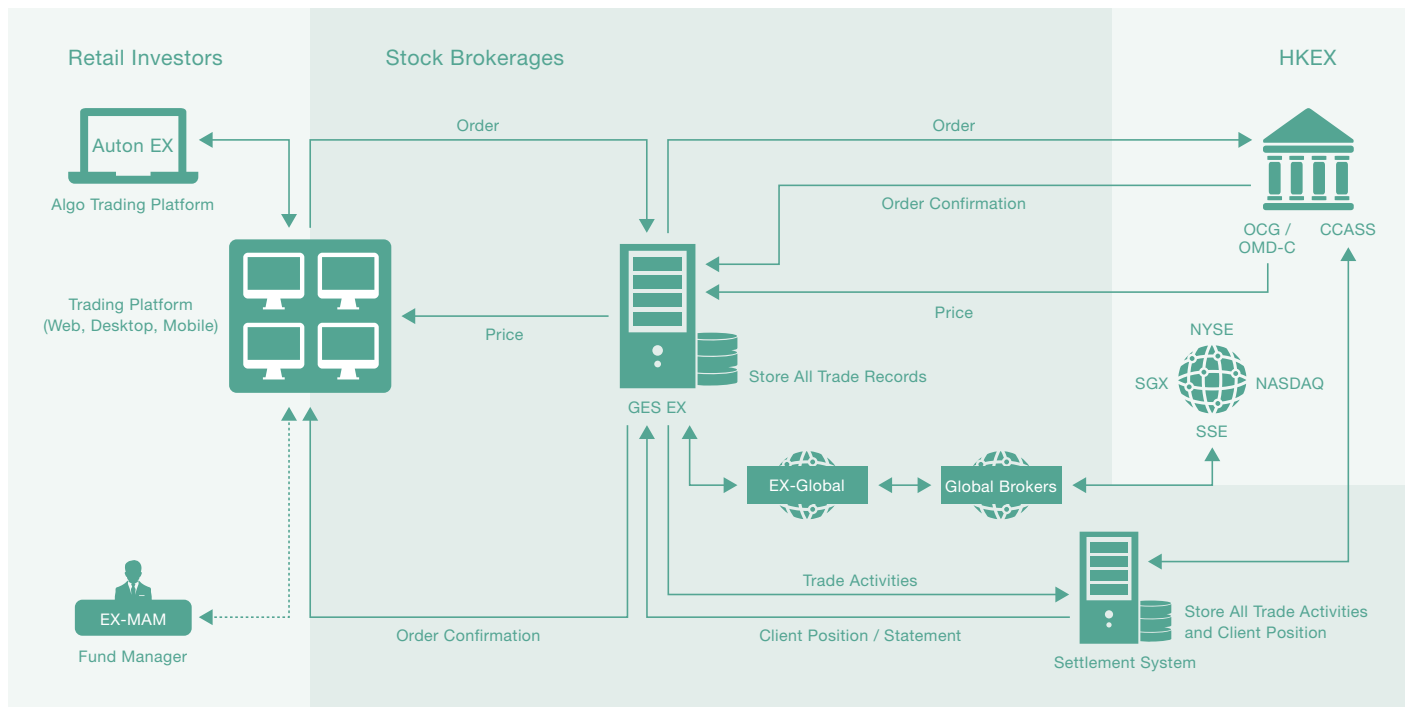

Support Cloud Trading and Various Packages

Support cloud trading, no additional hardware is required which can be deployed quickly. Optional dedicated server purchase and hosting service is also provided based on customer requirement.

GES EX Securities Trading Architecture

Add-on Module

EX-MAM (Multi-Account Manager)

Fund manager can place orders for multiple funds at one time, and trades can be automatically allocated to each fund accounts by predefined percentage. All orders and their allocation methods will be shown in the daily trading reports, alleviating the hassle of manual order.

EX-Global (Global Securities Trading)

Support FIX/API connection with the trading system of 3rd party global brokers, which helps brokerages to expand global equities business.
