

# GES TX

A Sophisticated Trading Solution Especially  
Designed for Brokerages

Supporting Forex, Bullion, CFDs and  
Options

## The Most Comprehensive Liquidity & Risk Management Solutions

### TX-Cloud

A simple STP plug-in which can be installed in MT4 server directly, allowing you to access top-tier liquidity without additional software and hardware. You may also enjoy GES value-added services which include top-tier data centre and dedicated data line, which ensures the most stable pricing and the fastest connection.

### TX-Bridge

A dedicated liquidity solution for brokerages using MT4 server. TX-Bridge is equipped with flexible order routing features especially designed for Asian market. Advanced routing rules include routing per group, product or percentage etc., which caters the needs of A Book brokerage with the agile overriding mechanism.

### TX-Hybrid

The most powerful A/B Book mixed trading solutions, fully covering all the functions that traditional market makers (B Book) and STP brokers (A Book) need. TX-Hybrid helps you to gain total control over your risk exposure no matter you are dealing with scalper or market fluctuation.

### Position Management

By using our advanced routing rules, all orders can be defined to route by per group, per product routing, or by portion. Complementing by our override mechanism, an A Book client could be excluded from routing out to LP. Such flexibility gives you a higher controllability on every trade execution.

### Top Tier Inter-Bank Liquidity

By leveraging the ultra-low latency infrastructure and multi connections to top tier ECNs and liquidity providers, brokerages can benefit from the greatly reduced slippage on limit / stop order and cut position, effectively minimize the risk and maximize their profits by accessing inter-bank liquidity.

### Robust Pricing Engine

TX-Hybrid and TX-Bridge include robust built-in pricing engine, which supports multi-feed connection and integrates different feeds through sophisticated algorithm, helping to improve the pricing quality and avoid disconnection problem. The built-in filter and volatility mechanism can filter out spike price and invalid price smartly, or auto enlarge the spread on top of the market spread, instantly protecting a dealer from suffering a loss.

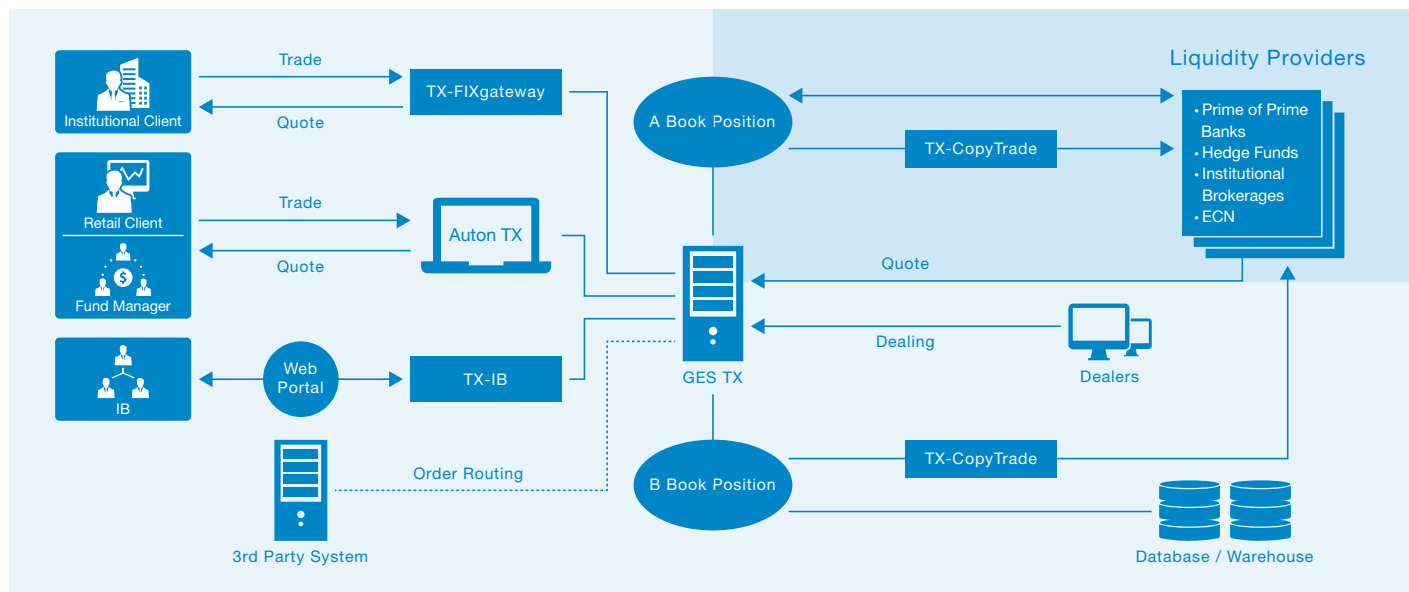

### Comprehensive Reports

TX-Hybrid provides more than 50 types of reports which are available for audit and regulatory compliance. Dealers are able to check on any suspicious trading pattern in daily trading record and categorize specific clients for further handling. For compliance, TX-Hybrid supports the trading and reporting requirements of SFC of Hong Kong, FCA of United Kingdom, ASIC of Australia, FSA, FFAJ and JSDA of Japan, as well as other regulatory bodies of different countries.

## TX-Hybrid Trade Flow

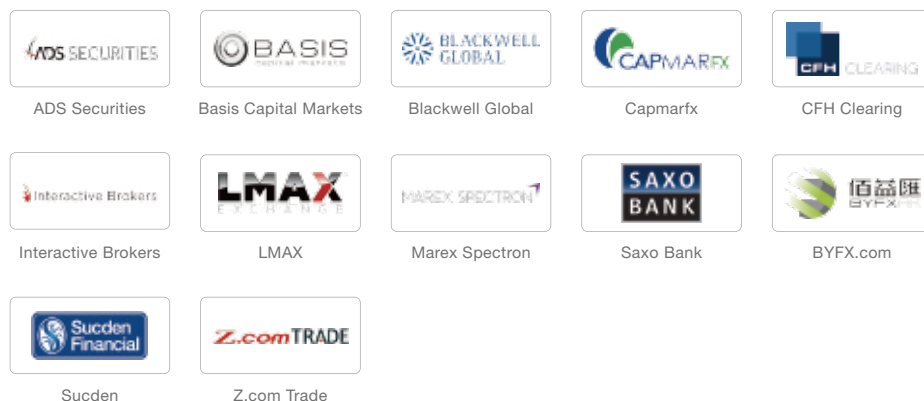

## Liquidity Source

### ECNs & Aggregators

### Liquidity Partners

## Add-on Modules

### TX-FIXgateway

A module for TX-Hybrid or TX-Bridge allows other MT4 or 3rd party trading platform routing their orders to a consolidated TX-Hybrid server by FIX protocol with full control on routing condition and margin requirement.

### TX-CopyTrade

A server layer copy technology for handling of large order by splitting it to multiple LPs.

### TX-IB

An Introducing broker ("IB") system with web portal for commission and rebate calculation and review IB business performance.

### TX-GeneralOption

A module for TX-Hybrid together with Auton TX to support the trading of general option.
